Colaboración en GitHub

Temario

- Issues
 - Asociar PRs con Issues
 - Manejo de issues en un repositorio
- Pull requests
 - Creación de PRs
 - Drafts
 - Status de un PR
- Revisión de código
- Discusiones

GitHub tiene integrado un gestor de bugs en forma de Issues. Cada Issue representa un problema o mejora del proyecto.

Issues

Dentro de cada Issue se pueden poner comentarios en los que informar de los progresos o debatir la mejor forma de solucionarla.

The screenshot displays the GitHub Issues interface. At the top, navigation tabs include Code, Issues (20), Pull requests (0), Projects (2), Wiki, Pulse, Graphs, and Settings. Below the tabs, a search bar contains the text 'is:issue is:open', and a 'New issue' button is visible. The main content area shows a list of 20 open issues, each with a checkbox, a status icon (green circle with an exclamation mark), a title, labels, and a status. The issues are sorted by 'Open' status. The first issue is 'Add value to --yarpLocalImageManager parameter for camera selection' (enhancement). The second is 'Avoid hardcoding remote YARP device launchers' (blocked, bug, enhancement). The third is 'Developer manual v1.0' (enhancement). The fourth is 'Unbreak tests on Travis' (development). The fifth is 'InitScreen does not work well with fullscreen' (enhancement). The sixth is 'Exit game when server logs player out' (enhancement). The seventh is 'Add --quiet flag to RdServer to disable stdout feedback' (idea). The eighth is 'This side up for QR codes' (question). The ninth is '[travis-clang] testRdYarpNetworkManager 16167 Illegal instruction' (bug).

Issue #	Title	Labels	Status	Author	Created
#91	Add value to --yarpLocalImageManager parameter for camera selection	enhancement	Open	jgvictores	14 hours ago
#89	Avoid hardcoding remote YARP device launchers	blocked, bug, enhancement	Open	PeterBowman	15 days ago
#88	Developer manual v1.0	enhancement	Open	David-Estevez	29 days ago
#87	Unbreak tests on Travis	development	Open	PeterBowman	Dec 24, 2016
#85	InitScreen does not work well with fullscreen	enhancement	Open	David-Estevez	Dec 19, 2016
#83	Exit game when server logs player out	enhancement	Open	David-Estevez	Dec 7, 2016
#82	Add --quiet flag to RdServer to disable stdout feedback	idea	Open	David-Estevez	Dec 7, 2016
#78	This side up for QR codes	question	Open	jgvictores	Nov 23, 2016
#69	[travis-clang] testRdYarpNetworkManager 16167 Illegal instruction	bug	Open	jgvictores	Oct 16, 2016

Pull Request

Si has hecho un Fork de un proyecto y has añadido modificaciones útiles para los usuarios del repositorio original, puede ser interesante integrar esos cambios en ese repositorio. Para ello, podemos hacer una petición al autor en forma de Pull Request, mediante el botón "New Pull Request" de la pestaña "Code".

Comparing changes

Choose two branches to see what's changed or to start a new pull request. If you need to, you can also [compare across forks](#).

 base fork: **roboticslab-uc3m/Installation...** ▾

base: **develop** ▾ ...

head fork: **David-Estevez/Installation-gu...** ▾

compare: **develop** ▾

✓ **Able to merge.** These branches can be automatically merged.

 **Create pull request**

Discuss and review the changes in this comparison with others.

github-learning-lab [bot] left a comment

Good pull requests have a body description that tells other contributors about the change you're suggesting, so they understand the context.

Let's edit this pull request to add a body description.

Activity: Fixing your pull request

1. The first comment on your pull request will have the default text of **No description provided**. Click on the ... icon located at the top right corner of the comment box, then click on **Edit** to make an edit

Asociar PRs con Issues

- Puedes vincular un PR o una rama a un issue para mostrar que una solución está en progreso y para cerrar automáticamente el issue cuando se fusione el PR o la rama.
- Esto se realiza utilizando una palabra clave compatible en la descripción de la solicitud o en un mensaje de commit. **El PR debe estar en la rama predeterminada:**
 - close
 - closes
 - closed
 - fix
 - fixes
 - fixed
 - resolve
 - resolves
 - resolved

Draft PRs (borrador)

- Cuando creas un PR, puedes elegir listo para revisión o en borrador.
- Los PRs en borrador no se pueden fusionar y no se les solicita automáticamente a los propietarios del código que revisen algo.
- Un PR en borrador es una forma de iniciar una conversación que no está lista para ser evaluada.

Estados de un PR

- **Open:** El estado inicial de un PR cuando ha sido creado pero aún no se ha revisado ni fusionado. Este estado indica que el PR está buscando activamente comentarios o aprobación de otros desarrolladores.
- **Closed:** Este estado significa que el PR se ha finalizado sin fusionarse. Esto puede suceder si los cambios propuestos ya no son necesarios o si se ha implementado una solución diferente.
- **Merged:** indica que el PR se ha fusionado exitosamente en la rama de destino y los cambios ahora son parte de la base de código principal.
- **Draft:** Un PR en modo borrador que no está listo para ser fusionado, representa un trabajo en progreso.

Discusiones

Categorías de las Discusiones

-  **Announcements:** Actualizaciones y noticias de los mantenedores del proyecto. Para publicar anuncios.
-  **General:** Cualquier cosa que sea relevante para el Proyecto – Para crear debates abiertos.
-  **Ideas:** Para cambiar o mejorar el Proyecto. Para generar un debate abierto.
-  **Polls:** Sondeos con varias opciones para que la comunidad vote y debata.
-  **Q&A:** Preguntas para que responda la comunidad, con un formato de pregunta/respuesta.
-  **Show and tell:** Creaciones, experimentos, o pruebas relevantes para el Proyecto. Para crear debates abiertos.
